Professional Experience

FPT Software — Hanoi, Vietnam

AI Leader — 06/2026 - Present

- **AI Coding Agent for Android Automotive**: Developing an AI Coding Agent platform that supports Android engineers in UI development; the platform has completed its PoC and is moving to mass production.
- Leading the team building an agent that covers every SDLC phase from requirements to integration testing: Requirements Traceability Matrix (RTM), AAOS 16 feasibility analysis, Software Architecture Document (SAD), Software Design Document (SDD), code generation, unit test generation, and integration test generation.
- **Tech stack**: Harness engineering for AI agents (context, tools, verification loops, guardrails, observability controls); Model: Qwen-3.8-27B-NVFP4; Platform: GitHub Copilot CLI.
- **Skills**: Project Management, Team Management, NLP, AI Agents.

eUp — Hanoi, Vietnam

AI Consultant (Freelance, Remote) — 07/2026 - 10/2026

- Consulted on AI solutions for Mazii Dictionary products.
- Developed Conversational AI for Japanese learners.

AI Engineer — 11/2024 - 06/2026

- **Todaii Japanese**: Fine-tuned GPT-4 with supervised fine-tuning (SFT) to rewrite NHK articles by JLPT level; built prompt workflows and evaluation loops with the OpenAI API.
  Rating quality from 1,000+ users feedbacks showed a 80% improvement in readability and comprehension for JLPT N5-N3 levels.
- **Mazii Dictionary**: Built a personalized Japanese dictionary lookup using a summarized user-profile cache (distilled from session-history summarization) injected at query time via a LangGraph state machine over Gemini 3 — bounding per-request context cost as history grows;
  Current active users: 20,000+, rating 4.2/5 satisfaction.
- **Mazii Speech**: Built real-time Japanese TTS with text conditioning, voice cloning with Rectified Flow Diffusion Transformer (RF-DiT); Optimized inference with INT8 quantization, ONNX and LRU caching.
- **Mazii Foundation Model**: Post-training (DFT) Gemma 4 MoE to Japanese foundation model for vocabulary, kanji, grammar, and general knowledge base. Optimized inference with 4-bit quantization (NVFP4), serving with vLLM engine.
  Implemented for internal Japanese editors/collaborators with 4.8/5 satisfaction rating.
- **Hanzii**: Built personalized AI characters for Chinese learners; Applied Post-training (Online-DPO with Claude-Opus-4.6) in GLM-4. Optimized inference with 8-bit quantization (FP8), serving with SGLang engine. Deploy to production using LangChain, and LangGraph.
  Current active users: 1,000+ with a 4.7/5 average satisfaction rating.

Panasonic R&D Center Vietnam — Hanoi, Vietnam

AI Engineer — 07/2024 - 10/2024

- Researched and developed the C-level Translation Agent, a meeting-audio assistant for transcription, translation, and meeting notes.
- Integrated ASR with speaker diarization, OpenAI API, FastAPI workflows for internal use.

VinBigData Institute — Hanoi, Vietnam

Teaching Assistant — 07/2024 - 08/2024

- Supported the NLP course for the VinBDI AI Engineer Training Program, including lectures, exercises, and student guidance.

Kaopiz Software Co., Ltd. — Hanoi, Vietnam

AI Engineer — 06/2023 - 06/2024

- Developed Japanese OCR modules for text detection and recognition using RCNN, CRNN, and PaddleOCR.
- Optimized model runtime with ONNX, TensorFlow Lite, and OpenVINO for Intel CPU deployment.
- Built an image-matching service for FOCUS Media using image embeddings, compression, and augmentation; containerized the service with Docker and achieved 93.64% search accuracy.

Intelligent Software Engineering Lab - BKAI — Hanoi, Vietnam

Research Assistant — 03/2022 - 09/2023

- Researched AI-assisted software engineering across requirements engineering and debugging.

Education

Hanoi University of Science and Technology — Hanoi, Vietnam

Master's Student, Data Science Program, Information and Communication Technology (Current CPA: 3.64/4.0) — 10/2025 - Present

Hanoi University of Science and Technology — Hanoi, Vietnam

Engineer Degree, Information and Communication Technology (Very Good) — 09/2019 - 09/2024

High School for the Gifted - Vinh University — Nghe An, Vietnam

Physics (Very Good) — 09/2016 - 09/2019

Technical Skills

- **Programming**: Python, C++
- **ML / DL**: Model Training - Evaluation - Compression, Deep Reinforcement Learning, Transformers-based models, Causal Language Modeling, Optimal Transport, Speech Processing
- **AI Agents**: Harness Engineering, Prompt Engineering, RAG, LangChain, LangGraph, LangSmith, OpenAI API, GitHub Copilot CLI
- **AI Frameworks**: Hugging Face, PyTorch, TensorFlow
- **AI Inference / Optimization**: ONNX, OpenVINO, SGLang, vLLM, TensorRT-LLM, KV-cache optimization, Flash Attention, Speculative Decoding
- **Backend / Tools**: Docker, Flask API, FastAPI, Git, GitLab
- **Leadership**: Project Management, Team Management

Additional

- **Award**: Best Presentation Award, Summer School 2023 on Modern Machine Learning: "Foundations and Applications" (BKAI, NAVER, VinBigData)
- **Publication**: Japanese Knowledge Base Synthetic Data
- **Languages**: English (TOEIC 885)
