PROFESSIONAL EXPERIENCE

eUp AI Engineer	Hanoi, Vietnam 11/2024 - Present
◦ Todaii Japanese: Fine-tuned GPT-4 with supervised fine-tuning (SFT) to rewrite NHK articles by JLPT level; built prompt workflows and evaluation loops with the OpenAI API. Rating quality from 1,000+ users feedbacks showed a 80% improvement in readability and comprehension for JLPT N5-N3 levels. ◦ Mazii Dictionary: Built a personalized Japanese dictionary lookup using a summarized user-profile cache (distilled from session-history summarization) injected at query time via a LangGraph state machine over GPT-4 — bounding per-request context cost as history grows; Current active users: 12,000+, rating 4.2/5 satisfaction. ◦ Mazii Speech: Built real-time Japanese TTS with text conditioning, voice cloning with Rectified Flow Diffusion Transformer (RF-DiT); Optimized inference with INT8 quantization, ONNX and LRU caching. ◦ Mazii Foundation Model: Post-training (DFT) Gemma 4 MoE to Japanese foundation model for vocabulary, kanji, grammar, and general knowledge base. Optimized inference with 4-bit quantization (NVFP4), serving with vLLM engine. Implemented for internal Japanese editors/collaborators with 4.8/5 satisfaction rating. ◦ Hanzii: Built personalized AI characters for Chinese learners; Applied Post-training (Online-DPO with Claude-Opus-4.6) in GLM-4. Optimized inference with 8-bit quantization (FP8), serving with SGLang engine. Deploy to production using LangChain, and LangGraph. Current active users: 1,000+ with a 4.7/5 average satisfaction rating.	
Panasonic R&D Center Vietnam AI Engineer	Hanoi, Vietnam 07/2024 - 10/2024
◦ Researched and developed the C-level Translation Tool, a meeting-audio assistant for transcription, translation, and meeting notes. ◦ Integrated ASR with speaker diarization, OpenAI API, FastAPI workflows for internal use.	
VinBigData Institute Teaching Assistant	Hanoi, Vietnam 07/2024 - 09/2024
◦ Supported the NLP course for the VinBDI AI Engineer Training Program, including lectures, exercises, and student guidance.	
Kaopiz Software Co., Ltd. AI Engineer	Hanoi, Vietnam 06/2023 - 06/2024
◦ Developed Japanese OCR modules for text detection and recognition using RCNN, CRNN, and PaddleOCR. ◦ Optimized model runtime with ONNX, TensorFlow Lite, and OpenVINO for Intel CPU deployment. ◦ Built an image-matching service for FOCUS Media using image embeddings, compression, and augmentation; containerized the service with Docker and achieved 93.64% search accuracy.	
Intelligent Software Engineering Lab - BKAI Research Assistant	Hanoi, Vietnam 03/2022 - 09/2023
◦ Researched AI-assisted software engineering across requirements engineering and debugging.	

EDUCATION

Hanoi University of Science and Technology Master's Student, Data Science Program, Information and Communication Technology (Current CPA: 3.64/4.0)	Hanoi, Vietnam 10/2025 - Present
Hanoi University of Science and Technology Engineer Degree, Information and Communication Technology (Very Good)	Hanoi, Vietnam 09/2019 - 09/2024
High School for the Gifted - Vinh University Physics (Very Good)	Nghe An, Vietnam 09/2016 - 09/2019

TECHNICAL SKILLS

- **Programming**: Python, C++
- **ML / DL**: Model Training - Evaluation - Compression, Deep Reinforcement Learning, Transformers-based, Encoder-Decoder models, Causal Language Modeling
- **AI Agents**: Prompt Engineering, RAG, LangChain, LangGraph, OpenAI API
- **AI Frameworks**: Hugging Face, PyTorch, TensorFlow, TensorFlow Lite
- **AI Inference / Optimization**: ONNX, OpenVINO, SGLang, vLLM, TensorRT-LLM, KV-cache optimization, Flash Attention, Speculative Decoding
- **Backend / Tools**: Docker, Flask API, FastAPI, Git, GitLab

ADDITIONAL

- **Award**: Best Presentation Award, Summer School 2023 on Modern Machine Learning: "Foundations and Applications" (BKAI, NAVER, VinBigData)
- **Languages**: English (TOEIC 885)
